

The Federal Communications Commission

Dear The Federal Communications Commission,

I understand the proposal to change the method of determining the USF contribution factor would result in a per account fee rather than a usage fee. While I wholeheartedly support the purpose of the USF, I understand that a change in the contribution factor would push most carriers to raise the charges to smaller customers and lower the charges to larger customers. I feel that a contribution based on usage would be a fairer method.

Sincerely,

Charles Howting
